

LYME DISEASE RAGES

TICKS ARE OUT OF CONTROL!

THE USDA HAS APPROVED A TRANSFORMATIVE VACCINE FOR MICE TO STOP LYME AT THE SOURCE.

- 1 Humans and pets get Lyme disease from ticks.
- 2 Ticks primarily get Lyme bacteria from mice.
- 3 Non-infected mice cannot spread Lyme bacteria to ticks.

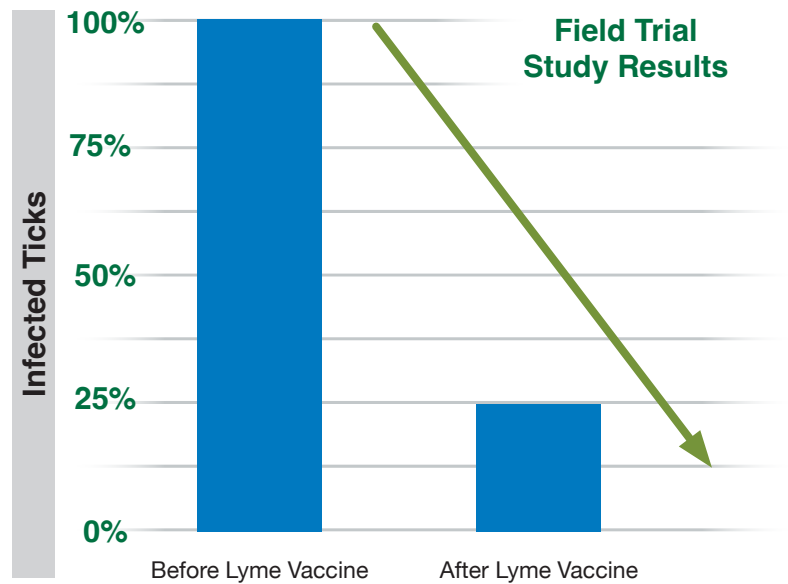

Vaccine-Coated Pellet

A 75%+ REDUCTION IN INFECTED TICKS

Lyme Vaccine Development:

- 20 Years of Research and Development
- Successful Field Trials in Partnership with the State of Connecticut and Yale University
- Proven to be Safe and Effective
- Studies Sponsored by the CDC and NIH

Fight Back!
